Try Facebook, Hangouts and myQuiz to transform teaching and learning
Why Facebook, hangouts and myQuiz?

Facebook groups are perfect for social networking, gathering your class, and sharing news (like schedules, links, and media). If you aren’t registered, try now!

With Google Hangouts, students can attend your live video lessons, communicate with you and with each other, answer your questions. Recently Google updated their hangouts for teachers.

In myQuiz, you can create educational quizzes on any topic and conduct them in real time (while presenting). After students submit their answer, they see the correct one.
**Short summary**

1. Create a new Facebook group and add your students
2. Start a new Hangouts group. Get a link so your class can join the new group
3. Create a game in myQuiz
4. Setup game's time and date. You can launch it manually, or schedule it
5. Get a link to share so students can join the game
6. Share your links in a Facebook post
7. Start a video call. Invite players by a link, or tell them a game's number
8. When everyone joins, start a game
9. After the game, a leaderboard with the TOP-10 players appears
10. Players can share their results on their Facebook page
Let's get started!
Facebook. Create a new group and add your students

First, start your Facebook group, if you haven’t any.

Name your group and add your students. You may want to add their parents, too.

Select ‘Private’ if you want to prevent others from joining the group.

Now you can share your content with the selected audience.
Hangouts.
Start a new group

Go to hangouts.google.com and create a new chat (if you don’t have a Google Account, you’ll be requested to create one).

Select people who you want to add, or add their emails/phone numbers. If there is no contacts in your hangouts, please, see the next slide.
Hangouts.
Get a link to share

Get a link to share in your Facebook post. Students can follow the link to join the group, even if they aren’t in your contacts list in hangouts.
myQuiz.
Create an educational quiz

Go to myQuiz Sign up page and create a new account. You can sign up using your Facebook account, too.

After the registration, select ‘My quizzes’ tab to get started with your quiz.
myQuiz.

Fill in the Quiz info

1. Add an image for a waiting screen. Students will see it before the game starts.

2. Fill in your topic and description.

3. Schedule the quiz. You can select any date and time, and/or start your quiz manually. If the date is selected, the quiz will be launched automatically.

4. Choose the default scoring system, or set up your own one (see the next slide).
Standard Scoring System:

- If a Player checks only correct answers, he/she gets 5 points for each correct answer.
- If the Player checks both correct and incorrect answers at the same time, he/she gets 1 point for each correct answer.
- If the Player doesn’t have any correct answers, he gets 0 points.
- The first player who checks all correct answers (without mistakes and wrong answers), gets +3 points, the second player with all correct answers gets +2 points and the third one receives +1 point for each correct answer.

If needed you can manually set points that a player will get for each correct answer to the question. To change the scoring system, use “Personal Scoring System” option.

Personal Scoring System:

- Set the number of points that a player will receive for each correct answer.
- For every wrong answer the number of points is reduced and this number is equal to the points set by the user for each correct answer. However, the total number of points a player will receive for the question cannot be less than 0. So if the player checks 1 correct and 2 wrong answers, his total score will be 0 points.
There are many other settings in myQuiz: you can add a link to a YouTube Live video streaming, limit registration types, etc.

But for now, you can select the Next button, and go to the Questions page.
myQuiz.
Add questions

Here you can copy and paste your questions in the visual editor, or type them in. Upload your own images, or use an image from myQuiz gallery. Added question image will be displayed to the players during the quiz.

You can add up to 5 answers for each question. You can set multiple correct answers, but at least one answer have to be marked as wrong.

Click "Add Question" to add a new one.

After you added all questions click the “Save” button.
After saving the game, you can return to My Quizzes tab. Here, all your created games can be found. From here, you can:

- Launch your game.
- Invite students to your game (see the next slide).
- Share your game with other teachers (they’ll get all questions and answers and will be able to launch the same game from their accounts).
- Edit or delete a game.

Launch a waiting screen for your quiz

At myQuiz website, go to My Quizzes tab and click ‘Launch Waiting Screen’. You’ll be redirected to a waiting screen of your quiz. Your students will follow the quiz link and see the same screen.

When you tell students the quiz number, they’ll be able to connect to the game via myQuiz main page.

The ‘Start game’ button will start the game, so click it only when everyone has joined, and/or when your video call is started.
At a scheduled time, start a video call with your group chat in hangouts.

It is recommended to find a location with a strong WiFi signal before. If you get some bandwidth issues, please turn off the camera.
Host a game

Make sure everyone has joined your game. You’ll see the number of connected users on your launch screen.

Press the ‘Start’ button to launch a game. Everyone will see the first question.

Players that answered faster and top 5 players will be displayed at the right. After every question correct answer will be shown.
Host a game

After each question, you’ll see the distribution between correct and incorrect answers. If there aren’t enough correct answers to a question, you can pause the game and discuss.
After the game, both you and your class see a leaderboard with the TOP 10 players. All player statistics is available at any time in the Archive tab.
Download quiz results

To see results of any of your quizzes, go to the Archive tab. Here, all your played quizzes are saved along with players’ statistics.
If you have any questions, feel free to contact us. We'll do our best to help you with your first quiz!
